Labor Has Real Power.

The GREAT FACT that the United POWER of Labor is THE UNION'S and ALL WORKERS' only weapon against the new menace of monopo-
lies and racketeering is the greatest weapon of all. The STRIKES of the past months have shown conclusively that this is true. The men of this country who are paid millions of dollars a year by the capitalist class have learned this lesson. They have struck in defense of their rights and in defense of their union rights. They have won. And they will win again. It is not only the workers who have learned this lesson. The people of this country have learned it, too. They have seen the results of the past months. They have seen the power of the workers. They have seen the power of the union. They have seen the power of the people. They have seen the power of the nation. They have seen the power of the world. They have seen the power of the universe. They have seen the power of the cosmos. They have seen the power of the infinite. They have seen the power of the eternal.
