Still Attempts To Frame O'Brien

The茂名 newspaper has been attacking the workers for the past weeks. They have attempted to frame O'Brien for a crime he did not commit. This is an attempt to divide the workers and weaken their unity.

The workers are determined to fight this injustice and to expose the attempts of the茂名 newspaper to frame O'Brien. They will continue to support and defend their comrade O'Brien.

The茂名 newspaper's actions demonstrate their lack of respect for the workers and their rights. They must be held accountable for their actions and be held responsible for the harm they cause.

The workers are calling on their comrade O'Brien to stay strong and to continue the fight for justice.

Labor's Buy-Ing. Power

By Mr. David Johnson

The argument that the maritime unions' single-minded activity is a factor in the so-called "labor's buy- ing power" is not unreasonable. No one is denying that there are cases where the labor organizations have/can influence the buying power of the general public. If this is true, then the labor organizations have achieved their goal and deserve the credit for their actions.

Many workers, especially in the maritime field, have a large amount of disposable income. This income is often spent on goods and services provided by union-organized businesses. By supporting these businesses, workers are indirectly supporting the labor unions, which in turn strengthens their bargaining power.

For example, during the recent strike by the longshoremen, many employers suspected that the workers were able to buy in bulk because of the union's influence. The employers felt that they were unable to compete with the prices offered by union-run stores.

This case is not an isolated incident. There are many other instances where labor organizations have used their collective buying power to negotiate better terms for their members.

However, it is important to note that the labor unions are not solely responsible for the increased buying power of their members. Other factors, such as increased productivity and higher wages, also contribute to this phenomenon.

In conclusion, while the labor unions' single-minded activity does have an impact on the buying power of their members, it is not the sole factor. Other factors, such as increased productivity and higher wages, also play a significant role in this phenomenon.

Vigilantes—Or Gangsters?

A ONE of the local theatres, a picture entitled "Bar- barous Coast" is getting a showing. In this super-
mystery picture, we find that the vigilantes get the lim-
rumors.

They go about hanging people from all available hanger in this picture.

Again, at a spectacle given under the auspices of the Chamber of Commerce as a highlight of Century of Com-
ber as a highlight of Century of Com-

to us. Therefore, we feel that it is logical to assume that the Chamber of Commerce would not let an event of this type take place.

The Chamber of Commerce is interested in promoting tourism, and if they are promoting tourism, they are not interested in promoting the hanging of people.

On the other hand, if the Chamber of Commerce is promoting tourism, they are interested in promoting the hanging of people.

It is difficult to say which of these scenarios is more likely, but we can be sure that the Chamber of Commerce is interested in promoting tourism.
