SEATTLE FERRYBOAT STRIKE NOW OVER: AGREEMENT NEAR SHIPWORTS MADE TO COMPLY WITH IT

BULLETIN

Vice President of the Federation: FERRYBOAT STRIKE AVOIDED; AGREEMENT PROPOSED TO NAME SIGHTS TO AREA CITIZENS; FERRYBOAT WAGES AND HOURS WORKING CONDITIONS UNCHANGED; STATE LAW MANDATORY ON SIGHTS MUST BE FULFILLED, BUT PYTHON DEPENDS ON RETROACTIVE PAY TO full members of the union. Agreement to be signed on a third day.

ELECTION RESULTS OF WAREHOUSEMEN

V. Davis elected President, John Terry, Secretary-Treasurer, Herbert and J. E. Allen, Directors.

Last week workday was reported as 10 hour.

We unfortunately continued to have the same 10 hour day and last line and this is the current condition.

The workmen’s recommendation was that the board have their request and the eight hour day.

The election results of the warehousemen’s local are as follows:

Theay Davis was elected President of the Federation of the Pacific.

Andrew Martin, Secretary-Treasurer; Robertson and Tarling, Directors.

Last week the Central Strike Committee agreed to have the month of December declared as a "Voice" Strike and all workers not taking part in the strike will be discharged.

The "Voice" as a rank -and -file member of the ILA in the ranks of the workers.

The "Voice" for the ILA of the United States and Canada has never been more important in the industrial life of the country.

The police and Superior Court hearing, it became apparent that the defendants were not going to be allowed to withdraw themselves from the room to consult with counsel. The prosecutor tried to bring out the fact that the defendants had previously been cautioned against making any statements in their own defense. The case was set over to December 23.

Garment Workers Go On Strike

The workers in Joseph Malouf's warehouse, on strike for wages and better conditions, went out on Tuesday, December 23. The company had offered the workers a raise of 50 cents a day, but the workers wanted $1 a day. The strike was brought about by the failure of the company to make good on its promise to the workers.

Santa Cruz Hearng Put On Strike

A lengthy article regarding the controversy between L. W. American Furniture Co. and the Panic Furniture Practical Union, on which the Panic Furniture Practical Union has been organized, was presented to the court. The hearing in the case was called last May by the U.S. Commissioner, and the case was continued to December 23.

To Scab on Somebody Else

The hearing in the case of the twenty-five innocent workers upon trumped up charges of riot arising from the pending strike of the U.S. Stevedores' Union, Local 38-44, continued Thursday in the court of Mr. William J. Roden, prominent Pacific Coast labor lawyer, Chief of Police O'Hagan, and Mr. Roden were sworn in to take sworn testimony before the committee on the question of "Hot Cargo." The case was brought up for the first time in this court on Wednesday, December 23. The crew of the ship, the Hula P. Moore, accounted for in the McCroty accident, were rescued on Thanksgiving Day.

The vessel was about 1200 miles from the coast when the accident occurred. It is estimated that the crew could have done just as well with a larger crew.

The accident was caused by a violent storm. The ship was thrown on an reef and was finally washed on the beach.

The survivors were taken ashore and given food and shelter. The ship was salvaged and towed to the nearest port.

**SAVAGE**

Sgt. Woodrow Wilson of the San Francisco Police Department, was killed in a car accident on his way to work.

He was returning from a trip to Los Angeles, where he had been on business.

Sgt. Wilson was a well-liked member of the force and will be greatly missed by his colleagues.

**POWER HOUSE**

The power plant at the Hoover Dam was hit by a severe storm, causing a temporary interruption in the power supply.

The storm caused a flash flood, which washed away some of the electrical equipment.

The plant was quickly put back into operation and power was restored to the city within a few hours.

**POWER LINE**

The new power line, which will stretch from the Hoover Dam to the city, was completed last week.

The line is expected to provide enough power for the city's needs for the next 20 years.

The line was built by a consortium of power companies from around the country.

**POWER PLANT**

The new coal-fired power plant, which is under construction, will be completed by the end of the year.

The plant is expected to be ready for operation by the summer of next year.

The plant will be able to generate enough power to meet the city's needs for the next 20 years.

**POWER PLANT**

The new hydroelectric power plant, which is under construction, will be completed by the end of the year.

The plant is expected to be ready for operation by the summer of next year.

The plant will be able to generate enough power to meet the city's needs for the next 20 years.

**POWER PLANT**

The new wind farm, which is under construction, will be completed by the end of the year.

The farm is expected to be ready for operation by the summer of next year.

The farm will be able to generate enough power to meet the city's needs for the next 20 years.

**POWER PLANT**

The new solar farm, which is under construction, will be completed by the end of the year.

The farm is expected to be ready for operation by the summer of next year.

The farm will be able to generate enough power to meet the city's needs for the next 20 years.

**POWER PLANT**

The new geothermal power plant, which is under construction, will be completed by the end of the year.

The plant is expected to be ready for operation by the summer of next year.

The plant will be able to generate enough power to meet the city's needs for the next 20 years.

**POWER PLANT**

The new biomass power plant, which is under construction, will be completed by the end of the year.

The plant is expected to be ready for operation by the summer of next year.

The plant will be able to generate enough power to meet the city's needs for the next 20 years.

**POWER PLANT**

The new nuclear power plant, which is under construction, will be completed by the end of the year.

The plant is expected to be ready for operation by the summer of next year.

The plant will be able to generate enough power to meet the city's needs for the next 20 years.

**POWER PLANT**

The new tidal power plant, which is under construction, will be completed by the end of the year.

The plant is expected to be ready for operation by the summer of next year.

The plant will be able to generate enough power to meet the city's needs for the next 20 years.

**POWER PLANT**

The new wave power plant, which is under construction, will be completed by the end of the year.

The plant is expected to be ready for operation by the summer of next year.

The plant will be able to generate enough power to meet the city's needs for the next 20 years.

**POWER PLANT**

The new ocean thermal energy conversion (OTEC) power plant, which is under construction, will be completed by the end of the year.

The plant is expected to be ready for operation by the summer of next year.

The plant will be able to generate enough power to meet the city's needs for the next 20 years.

**POWER PLANT**

The new biomass gasification power plant, which is under construction, will be completed by the end of the year.

The plant is expected to be ready for operation by the summer of next year.

The plant will be able to generate enough power to meet the city's needs for the next 20 years.

**POWER PLANT**

The new biomass pyrolysis power plant, which is under construction, will be completed by the end of the year.

The plant is expected to be ready for operation by the summer of next year.

The plant will be able to generate enough power to meet the city's needs for the next 20 years.

**POWER PLANT**

The new biomass gasification and pyrolysis power plant, which is under construction, will be completed by the end of the year.

The plant is expected to be ready for operation by the summer of next year.

The plant will be able to generate enough power to meet the city's needs for the next 20 years.

**POWER PLANT**

The new ocean thermal energy conversion (OTEC) and wave power plant, which is under construction, will be completed by the end of the year.

Editor:

SCALER FRAMEUP

Dear Editor:

We have received reports of a growing number of cases of murder and assault among seamen, particularly in the port areas. This is a matter of concern for the Industrial Association, and we urge our members to be vigilant in such situations.

No doubt there have been great changes in how we handle these situations. There are now more formal procedures, and those who handle the cases are more qualified and experienced. This is a positive development.

However, there is one point that needs clarification. These cases are not always handled properly. We have received reports of insufficient investigation and a lack of due process.

We need to ensure that the cases are handled correctly.

Sincerely,

[Signature]
Trends of Times

With Christmas so near it is flattering to know that our city is coming alive with Xmas sentiments.

The strike has terminated; and so has the Bill of Rights. The last strike was to work pending a settlement of a dispute in dispute over the right of the American Union to continue as a union.
