In today's labor movement, there is a tendency to overemphasize the importance of the rank and file. The "Rank and File" is a forum where rank-and-file members can express their views and concerns. It provides a platform for discussion and debate on issues affecting the working class. The "Rank and File" is not a replacement for the formal channels of representation, but it is an important way for rank-and-file members to have their voices heard. Join the "Rank and File" and be part of the movement for change.

HOW FASCISM COMES

From (Electrical Workers' Journal)

In this day of rapid changes, it is well to remember how Fascism comes:

1. A magnetic leader arises who hypostatizes the mob. He is in the public ear.

2. A magnetic leader makes growing premises which he does not hope to fulfill and which appear to promise a betterment of conditions. He is in the public mind.

3. A magnetic leader urges the pressure of mob tactics to destroy capital and the law. He is in the public will.

4. A mob revolts and feels that a new day is being created. The conditions are favorable to the reformation of the state.

5. The leader rides into greater power. He becomes all-powerful. He is in the public control.

6. He issues from the state to him a discharge of living dead. He is in the public conscience.

The labor movement is a democratic movement. It seeks to better the conditions of human life by the application of the democratic principles of freedom and justice.

Above all else, it must think rather than merely feel.

The facts of the matter in Senator Copeland's inquisition has its funny side, but that is one main objective.

We must not be deluded by red-baiting, whether inspired by labor or business interests. The witch hunters are using red-baiting as a tool of reaction to fight against the progress of the workers.

A vigorous campaign is being waged to prevent the election of candidates who favor workers' rights. The workers must stand together to fight against this campaign.

COMMUNITY, neither am I on the National Maritime Union. I was asked this question on the floor of the Senate, and I answered it. I will now say this: if the request of any Senator is to be in order, that Senator must have a reasonable basis for making that request. The request must be a reasonable one.

The reason why the Senate is being changed and reactionary forces are being given wide publicity, is the reason why Fascism is coming and Fascism is going.

We must keep in mind that Fascism is a political force, and if the Fascist system comes, it will come to stay. Therefore, we must keep the workers together and fight against Fascism.

Masters, Mates & Wires, West Coast Local No. 30, is in a legal position to strike. Twenty-four hours after noon, the last day of the present contract, the men will go out on strike. Pay will be stopped and the union will demand a new agreement. The United States Shipping Board has been notified of the threatened strike and is expected to announce its policy toward the dispute. The strike is the result of a difference between the union and the shipping companies over wages and working conditions. The union demands an increase in wages and a better working environment. The shipping companies, on the other hand, want to reduce costs and maintain current wages. The strike is expected to last for several days and could have a significant impact on the maritime industry.

Masters, Mates, and Wiremen's (M/M/W) are the largest and most influential of the maritime unions. They are responsible for negotiating contracts with shipowners and ensuring fair wages and working conditions for their members. The union represents approximately 21,000 workers on the West Coast and is a key player in the maritime labor market. The union's ability to negotiate favorable contracts is crucial to the economic well-being of its members and the overall health of the maritime industry. The strike is a significant development in the ongoing labor dispute, and its outcome will have important implications for the maritime industry at large.

Monopoly's Curb Backed by Farmers

Washington (AP) - AAA Administrator H. B. Tabor declared yesterday that AAA would not accept any more sacrifices of farmers for the common good. Speaking before a state farm meeting in Washington, Mr. Tabor said that farmers were already making sacrifices and should not be asked to make any more.

"We have seen the growth of the fink book," he said, "and we must now return the books to the people who made them."

Mr. Tabor added that the AAA's are not only relied upon for the common good, but also for the individual farmer's welfare. "It is not enough to give the farmers a sentence," he said, "they must have a book to read."

The AAA's are also relying on the government to help them in their work. "Our policy is to work with the farmers, not for them," said Mr. Tabor. "We must have the farmers' cooperation to be successful."

LABOR'S RESISTANCE TO PAY CUTS JUSTIFIED BY PLANS OF AUTO BUILDERS FOR 1934

(Federal Reserve Press) Latest news from the reconstruction front shows that the automobile industry has not yet been able to overcome the pay cut, but that it is not likely to be able to do so. The automobile industry, up to the present time, has had to bear a heavy burden of unemployment, and the situation has been aggravated by a number of important factors.

The fact is that the steel industry is not in a position to meet the demands of the automobile industry, and that it is not likely to be able to do so in the near future. The situation is even worse in the case of the great auto manufacturers, who have had to bear a heavy burden of unemployment.

However, the automobile industry is now making preparations for a new season of production, and it is expected that the situation will improve. The automobile industry is doing all it can to reduce its production, and it is hoped that the situation will improve by the end of the year.
