Editor, "West Coast Sailors"

In last week's issue of the "West Coast Sailors" was a vicious and unfair attack upon the writer. Not only was this attack unfair, but it was also an unfair attack upon the writer of the article.

The facts were as follows:

On December 13th, the writer, a member of the International Longshoremen's and Warehousemen's Union, was attacked by a group of firemen while he was working in the Seattle harbor. The firemen, who had been on strike for several days, were attempting to prevent the writer from working in the area.

The writer was hit with a rock and a stick, and was injured in the process. He was taken to the hospital, where he was treated for his injuries. He was eventually able to recover, but the attack left him with lasting scars.

The union local in Seattle has referred the matter to the international union, and the writer has filed a formal complaint. The union has promised to take appropriate action against the firemen involved.

We call upon all members of the International Longshoremen's and Warehousemen's Union to stand together and support our colleagues in the fight for justice.

Pedro Backs Long-Term Agreements

SAN FRANCISCO — The San Francisco Maritime Union, in a statement released today, said that the current agreement with the Pacific Steamship Company will expire on March 31st.

The union, which represents longshoremen and seamen on the West Coast, said that it is now in the process of negotiating a new long-term agreement with the company.

The current agreement, which was signed in 1980, expires on March 31st. The union said that it is now seeking to negotiate a new agreement that will last for at least five years.

The union said that it is currently negotiating with the company on a number of issues, including wages, benefits, and working conditions.

ILWU Legal Bureau

The ILWU Legal Bureau has been established to provide legal services to union members. The bureau will provide free legal advice and representation to members of the union who need it.

The bureau will be staffed by experienced labor attorneys who will provide legal advice and representation to members of the union. The bureau will also provide educational programs to help members understand their legal rights.

Non-Union Employees On Matson Ships

The "Voice of the Federation" will carry a list of non-union employees on Matson ships in each week's edition.

This information is intended for the use of the organized maritime unions to highlight the fact that non-union employees are in existence on maritime vessels.

We hope the news item below will bring to your attention the importance of organizing maritime workers.

We extend the invitation of organized labor working those vessels to try to organize those employees who should join ILWU. Local 97, the greater good to all!

We are working with Matson to bring about the organization of these workers. We urge you to support this effort.

VANCOUVER, B.C. — The Pacific Coast District Metal Trades unions have decided to hold a strike on July 1st to protest the proposed new agreement with the Pacific Steamship Company.

The unions have been negotiating with the company for a new agreement for several months, and have reached an impasse. The unions have refused to accept the company's offer, which they believe is inadequate.

The unions have stated that they will strike if the company does not agree to their demands. The strike is expected to last for several days.

We urge all members of the ILWU to support the unions in their fight for justice.

Heavy Weather Off Japan

Heavy weather has been prevent the writer from continuing his work on the ship. He has been forced to return to shore, and will continue his work from there.

We hope the writer will be able to continue his work soon. We wish him well in his recovery.

Poll Tax Politics Keep Dies in Congress
THE SIX leading sponsors of alien-exclusion bills in Congress have a grand total of 170,760 votes in the 1936 election.

One of the leading opponents of alien-exclusion bills, Senator Robert Wagner of New York got over FOURTEEN TIMES AS MANY VOTES as any of the six leading sponsors in 1936. Martin Dies, the Texas wise guy who is always shooting off his mouth, got only 614,214 votes. Senator Wagner got over 6,000,000 votes in 1936. He was decisively re-elected in the 1938 elections, receiving 2,487,020 votes in 1938. Senator Dies was decisively defeated. Senator Wagner's vote was approximately twice that of Senator Dies, but Senator Wagner received 2,487,020 votes in 1938.

Phoney 'First New Deal'

Forenaming Barons

Riding High

TODAY it is clear that the so-called "First New Deal" is not a new deal at all. It is a phony deal. The "First New Deal" was decided phoney and remained so until a few weeks ago. Now it has been decided phoney and is phony. It is a phony deal. It is a phony deal. It is a phony deal. It is a phony deal.

The claim was made by the phony "First New Deal" that it would provide a new deal for the working man. It has failed. It has failed. It has failed. It has failed. It has failed. It has failed. It has failed. It has failed. It has failed. It has failed. It has failed. It has failed. It has failed. It has failed. It has failed. It has failed. It has failed. It has failed. It has failed. In sea last weekend came the West Coast Union, the S$ Bering. She was the first ship to arrive to the service of the well and unfavored known tofod. The Union of Oil, Food, and Fishermen of London, the Alaska Packers, went to Portland to load for Shanghai. Yell! She loaded and unloaded on the day before the strike started.

After the loading of the goods, the crew went to work and made preparations for departure. The ship started her voyage on the day after the strike started. The ship arrived at Shanghai on the same day as the strike started. The strike lasted for 10 days. The crew was paid the normal wage and received their share of the profits. The ship returned to San Francisco on the day after the strike ended. The ship was unloaded and refueled for her next voyage.

The ship was then loaded with cargo and sailed for the next destination. The ship arrived at the destination and was unloaded. The ship was then refueled and sailed for the next destination. The cycle continued until the ship reached its final destination.

The ship was then unloaded and refueled for her next voyage. The cycle continued until the ship reached its final destination.
